ABOUT ME

I am currently pursuing my engineering degree at KC College of Engineering, maintaining a CGPI of 8+, with a strong passion for computers and software development. I am actively learning MERN stack development to strengthen my full-stack web development skills and have a solid foundation in Data Structures & Algorithms and core Java programming. Eager to work on real-world projects, I look forward to collaborating with like-minded individuals and grow with the tech industry.

PROJECTS

VIRTUAL BANKING SYSTEM

Virtual Banking System is a simulated platform that allows users to perform basic banking operations such as account creation, balance inquiry, money transfer, and transaction history tracking. It ensures secure and user-friendly management of virtual accounts, providing an experience similar to online banking.
